EUROPEAN INTELLIGENCE.

Vienna, Dec. 11. We daily expect the news of a general action between the Princes of Holberg and the Paffians in Franconia.

Hamburg, Dec. 17. The Persian situation late Franconia makes a great noise. The princes of the empire once took a resolution to apply for succor to the French King as guarantees of the treaty of Westphalia, but this design was wavered on their being informed that the French troops were in consequence of the present peace and honor that crown, to evacuate the empire from so as the representatives exchanged, and to return to more during this war.

We hear from Madrid, that the King of Spain has granted a pension of ten thousand livres to the widow of Don Velasco, who, on 17th, defended the Moro, at Havanna, and has given his son a title of nobility in Castile, which he is to bear by the name of the Marquis of the Fort Moro. The Duke of Bedford is preparing a grand equipage, in order to his public entry in quality of Ambassador Extraordinary from his Britannic Majesty, which is to be made about the middle of February next. This ceremony will give an additional luster to the festival; then to be celebrated on account of the conclusion of the peace, and to augment the splendor of this solemnity, an episcopal statue of his present Majesty, already finidh'd, is then to be erected.

It is reported that the Earl of Granville will forego his place of President of the Council on account of his great age and bad state of health, and that the Lord Chancellor is to be succeeded in that important office, which will occasion a general promotion among the gentlemen of the law.

From Ratibon they send us a rumour that the Ministers of England and Prussia have been ordered by the Grand Signor to quit Constantinople. Letters by this day's mail advise, that a negotiation between the courts of Vienna and Berlin is in great forwardness.

We have also a report that the Count de Sellem is coming to England with the character of Minisiter Plenipotentiary from the Empress Queen to renew the good understanding between the two courts. We are very strongly affirmed that the French have already sent ten men of war to the East-Indies, in order to be be-fread sh with it, and shew at some true French faith, and that a fleet of ours is already going there.

It is also affirmed that great obstacles to the definitive treaty have arisen, in consequence of some dispute between the French and English East-India companies.

Orders were given on Thursday night to the War Office, to continue the light troops in full pay till the 23d of next month, not being yet ready to disband them.

Yesterday there was a cabinet council at S. James's on affairs relating to the army, to which Lord Ligonier and several officers of the army were invited.

We learn from Spain, that the money and effects of the Count de Sperunda, late Viceroy of Peru, which had been landed at Ferrol from the Havanna, had been seized by the English, and that Count himself was expected to be put under arrest. That the money belonging to him was returned from the Havanna had also been seized, because they had neglected to register it, but it was thought it would be restored.

Advices from Amsterdam pretend that according to letters received there from Brazil, on the 6th of May, the English have received a considerable check on the coast of Coromandel, by the intervention of the attempt against the island of France, and that, in an assault on sea, they have also fired a very good gun behind the same piece bringing accounts, that six and a half of our vessels have been destroyed near the island of France, but it is hoped this will all prove Dutch news.

A gentleman from Peroutchatho declared that the French publishers there express the firm satisfaction on their being ordered home, and that great numbers of them, who were ordered on board for their return to France, had made their escape.

The last dispatch, published by the English intelli was disembodied at Adelphi, and had given them their regiment closely, and each of them 32 days pay to carry them to their respective homes.

The Calcutta Indians have actually, brought home the late Frenchmen that remained on the whole continent of Asia, and in the island of Sumatra, was taken about 11 months ago by three of our Indiamen—Algeria, 4,300, and, was confiscated in the East-Indies, has presently to enforce in England, in order to fulfil the 10th article of the treaty.

By this day we have also advice, that the forces designed for an expedition against the Manilla islands, were all ready to proceed, and only waited for an account of the declarative of war against Spain, and were in great expectations of success. But we have still a less pleasing account of the intended attack on the French at Mauritius, wisely planned by the late minister, for their utter extirpation from that quarter of the globe. Admiral Cornwallis during his cruise and delay, in expectation of the promised succours from Europe, hurried upwards of 1000 brave sailors, besides landmen, and returned sickly and disordered.
