THE EMPIRE.

We propose to say something more on the tariff upon the report of Mr. Mulroe, the Chairman of the Committee on Ways and Means, on the subject of the annexation of a number of districts to the United States, which measure was brought before the House by Mr. Green, the member for the district of New Hampshire.

The so-called "imperial" policy of the United States has been much talked of of late in this country, and it is said that the President is about to recommend to Congress the annexation of a number of districts to the United States, including the northern part of the St. Lawrence and the lake district.

The President is expected to make this recommendation on the ground that the annexation of these districts would be for the benefit of the United States, and that it would be consistent with the policy of the United States to annex all districts which are in any way connected with the United States.

The President is also expected to say that the annexation of these districts would be for the benefit of the United States, and that it would be consistent with the policy of the United States to annex all districts which are in any way connected with the United States.

The President is also expected to say that the annexation of these districts would be for the benefit of the United States, and that it would be consistent with the policy of the United States to annex all districts which are in any way connected with the United States.
